

# Design and Data

---

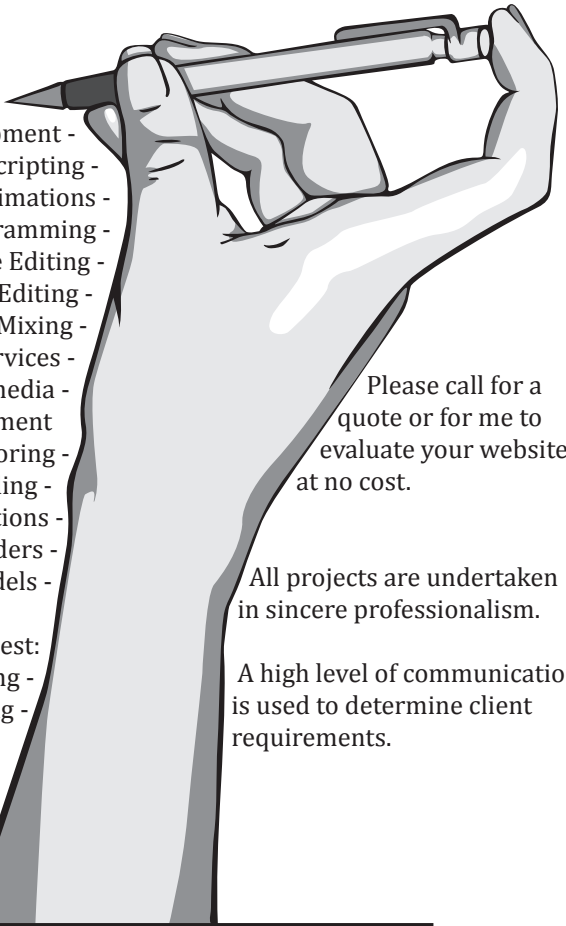

*Providing Digital Artwork and Multimedia Expertise to East Gippsland and beyond*

Design and Data is a small business that works to provide clients with technically acute and functional digital multimedia solutions. This incorporates a wide range of services for a variety of uses.

As a sole trader, I (James Bone) work hard to ensure that everything I deliver is not only functional on one of my systems, but for all platforms - this is essential when developing any software solution.
